

# Database Performance Monitor

## Open-Source Database Performance Monitoring

Database Performance Monitor (DPM) provides deep database performance monitoring at scale, without overhead. Our SaaS-based platform helps increase system performance, team efficiency, and infrastructure cost savings by offering full visibility into major open-source databases including MySQL, PostgreSQL, MongoDB, Azure SQL, Amazon Aurora, and Redis.

## FEATURES

- 24/7 monitoring, for both real-time and historical analysis
- One-second granularity helps you spot and diagnose small performance issues
- Compare queries, databases, and more with custom side-by-side views
- Comprehensive database performance analytics include query samples and explain plans
- Weekly and daily summary reports and customizable alerts
- Unified view of all your database types and servers to understand your system
- Meaningful summaries show you golden signals of service quality and health for database and system performance

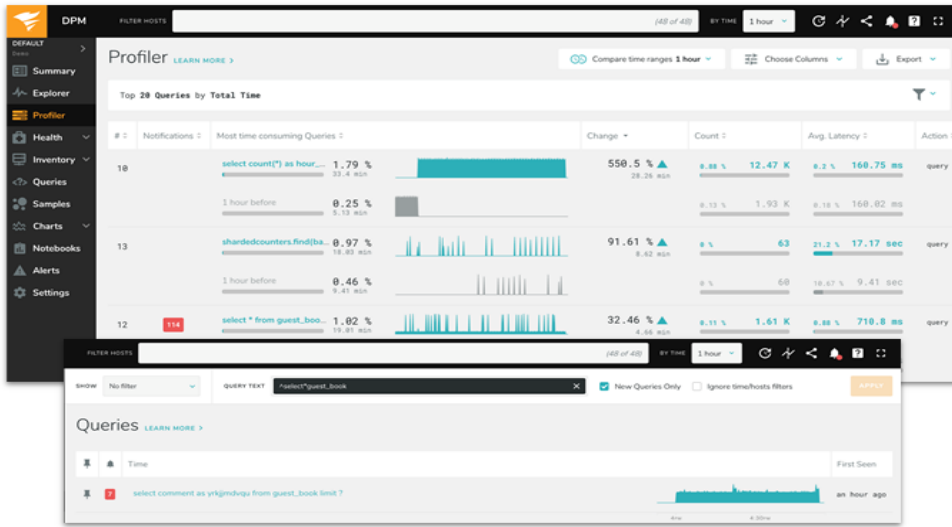

A SOLARWINDS PARTNER

## DATABASE SUPPORT

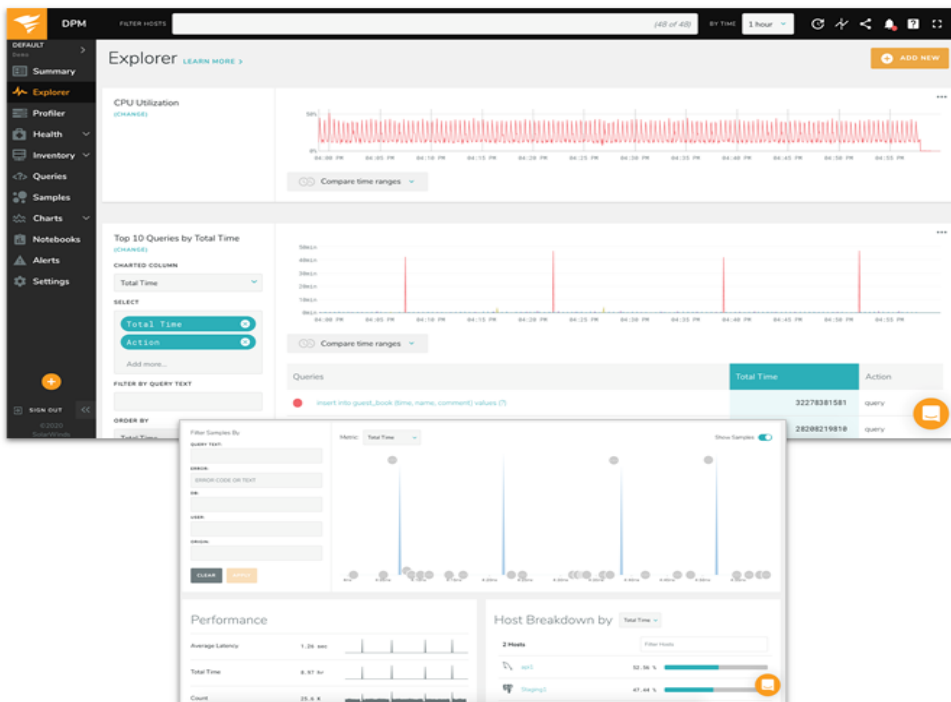

## DEPLOY CODE WITH CONFIDENCE

Compare query and system performance with before and after charts, and quickly search for newly introduced queries

## TROUBLESHOOT AND DIAGNOSE PERFORMANCE ISSUES

Visualize and correlate query behavior to system metrics to help troubleshoot performance issues and impact

## KEY BENEFITS

- Visualize thousands of collected metrics across thousands of databases with simple-to-create and -share charts
- Cross-functional team workflow is facilitated with notebooks to create and share knowledge
- Optimize resources and reduce database incidents with one-second resolution into workloads
- Ship better code
  - See query response before and after a deployment event
  - Examine query details and performance including samples and execution plans
  - Compare the performance of your top queries over time
- Troubleshoot and diagnose outages
  - Correlate query response or behavior to system metrics to understand impacts
  - Isolate unusual behavior and potential contributing factors within the database
- Understand database health
  - Track metrics and watch for trends with health summary for databases and systems
  - Get recommendations based on best practices
  - Explore and examine performance outliers

## DETAILS

- Support for physical, virtual, and cloud-based databases, including AWS RDS
- Architecture
  - Secure, cloud-hosted platform
  - In-flight and at-rest encryption
  - Role-based access control, single sign-on, and SAML integration
  - Configurable option to filter customer sensitive data
  - Built on the International ISO/IEC 27000 family of standards
  - GDPR compliant along with SOC 2 Type II certification
  - Alerting and integration module allows for injection warnings to be transmitted directly to email, Slack, VictorOps, or any number of messaging systems

## ABOUT SOLARWINDS

SolarWinds (NYSE:SWI) is a leading provider of powerful and affordable IT infrastructure management software. Our products give organizations worldwide, regardless of type, size, or IT infrastructure complexity, the power to monitor and manage the performance of their IT environments, whether on-prem, in the cloud, or in hybrid models. We continuously engage with all types of technology professionals—IT operations professionals, DevOps professionals, and managed service providers (MSPs)—to understand the challenges they face maintaining high-performing and highly available IT infrastructures. The insights we gain from engaging with them, in places like our **THWACK** online community, allow us to build products that solve well-understood IT management challenges in ways that technology professionals want them solved. This focus on the user and commitment to excellence in end-to-end hybrid IT performance management has established SolarWinds as a worldwide leader in network management software and MSP solutions.
